

One Day Comprehensive Workshop On ISO 9001:2015 Quality Management Systems

ISO 9001 is the international standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. It is the most popular standard in the [ISO 9000 series](#) and the only standard in the series to which organizations can certify.

ISO 9001 was first published in 1987 by the International Organization for Standardization (ISO), an international agency composed of the national standards bodies of more than 160 countries.

The current version of ISO 9001 was released in September 2015.

Changes introduced in the 2015 revision are intended to ensure that ISO 9001 continues to adapt to the changing environments in which organizations operate. Some of the key updates in ISO 9001:2015 include the introduction of new terminology, restructuring some of the information, an emphasis on risk-based thinking to enhance the application of the process approach, improved applicability for services, and increased leadership requirements.

ISO 9001 helps organizations ensure their customers consistently receive high quality products and services, which in turn brings many benefits, including satisfied customers, management, and employees. Because ISO 9001 specifies the requirements for an effective quality management system, organizations find that using the standard helps them: 1. Organize a QMS, 2. Create satisfied customers, management, and employees 3. Continually improve.

LEARNING OUT COME

Upon completion of this training, participants will be able to:

- ◆ Identify key benefits to your organization from implementing an effective QMS
- ◆ Develop a plan and determine the resources required for the implementation
